SUPPLEMENTARY INFORMATION:

I. Abstract

The Federal Fisheries Permits Program administered by the Southwest Region, NMFS, is the principal mechanism for monitoring participation in the pelagic longline, crustacean, bottomfish and precious corals fisheries in the western Pacific region. These fisheries are regulated under fishery management plans prepared by the Western Pacific Fishery Management Council and approved by the Secretary of Commerce. Persons wishing to participate in these fisheries must have permits, and permits are obtained from the Southwest Region, NMFS. Information on the permit application forms ensures up-to-date records for purposes of determining interests in the fisheries, participation, entry and exit patterns so that impacts on permittees from possible regulatory changes can be determined; for enforcement; and for advising fishermen of actual or potential changes in regulations.

II. Method of Collection

Permittees file applications for new permits, renewals, or other permit actions (e.g., permit transfers) with the Pacific Area Office, Southwest Region, and submit appropriate fees if required. Application forms are provided by the Pacific Area Office, which then reviews the application, determines that all information is furnished, obtains NOAA General Counsel clearance (to determine if there are any unpaid fines or penalties), and issues the permit. Permit information is then entered into the appropriate data base.

III. Data
